

FUNZIONALITÀ FUNCTIONALITIES FUNCIONALIDAD		ibx100 SPRAYER		ibx100 HYDRAULIC	
		Anet CAN-Bus	ISO BUS	Anet CAN-Bus	ISO BUS
Gestione chiusura automatica delle sezioni Automatic boom section closing Gestión cierre automático de las secciones		●	●		
Applicazione variabile Variable application Aplicación variable		●	●		
Raccolta dati di lavoro Work data collection Recogida de datos de trabajo		●	●		
Controllo luci di lavoro Working light control Control de la luz de trabajo		●	●		
Gestione SELETRON SELETRON management Gestión de SELETRON		●	●		
Gestione livello accessi utente User access management Gestión de acceso de usuarios		●	●		
Gestione ugelli di fine barra con valvole di sezione Fence nozzle management with section valve Gestión boquillas de extremo de barra con válvulas de sección			●		
Monitoraggio livello 2 cisterne 2 tanks level monitoring Control de nivel 2 tanques			●		
Gestione FLOWTRON FLOWTRON management Gestión de FLOWTRON			●		
Controllo diretto pompa di regolazione Direct control of the regulating pump Control directo de la bomba reguladora			●		
Funzionalità ISOBUS certificate AEF AEF ISOBUS certified functions Funciones ISOBUS certificadas AEF			●		●
Gestione TTC - Assale Sterzante TTC Management - Steering axle Gestión TTC - Eje de viraje				●	●
Gestione TTC - Timone Sterzante TTC Management - Steering drawbar Gestión TTC - Timón de viraje				●	●
Gestione BLC - Geometria fissa BLC management - Fixed geometry Gestión BLC - Geometria fija				●	●
Gestione BLC - Geometria variabile BLC management - Variable geometry Gestión BLC - Geometria variable					●
